

CIE Study Plan

Student Name		Student Number	
Program of Study			
Partner Institution			

Course load equivalency formulas are listed on the [CIE course mapping database](#). We recommend that you select 1-2 additional courses that exceed a full course load in case there are schedule conflicts or seat limitations. The courses you list on your study plan should represent courses that you would realistically be interested in studying and could be applied towards your degree. You should ensure over 50% of pre-mapped courses included in your study plan when you submit the CIE application, however, courses are subject to change before your departure date.

Please note that this study plan is for your CIE application only, it DOES NOT register you into courses at the partner institution.

Please discuss your study plan with [CIE Advisor](#) and your [Program Advisor](#), then have them sign off your study plan before submitting your application. *(UBCO students should send their study plan to soe.advising@ubc.ca and have their CIE Advisors sign off ONLY.)*
